

Personal Yatra Management System

Stakeholder Overview & Application Guide

Welcome to the Personal Yatra Management System, a lightweight, intuitive, and extremely fast platform designed exclusively for organizing and managing spiritual tours (Yatras) for devotees.

Live Application Access

Application URL: <https://rohitwadhvani83.github.io/personal-yatra-manager/> (<https://rohitwadhvani83.github.io/personal-yatra-manager/>)

Demo Access Credentials

The application features a secure, role-based architecture. You can use the following credentials to access the live system and explore its capabilities:

- **Super Admin (Full Access & Database Configuration)**
 - **Email:** rohit.wadhvani83@gmail.com
 - **Password:** admin123
- **Admin (Yatra Manager)**
 - **Email:** admin@yatra.com
 - **Password:** admin123
- **Devotee / Participant Portal**
 - **Phone Number:** 9876543210 (Ramesh Sharma Demo Account)

Key Features & Capabilities

The platform is designed with a "Google Sheets meets Notion" philosophy, ensuring that operations require minimal clicks and operate at lightning speed.

1. Centralized Command Dashboard

- View all active, planned, and completed Yatras in a single interface.
- Real-time statistics displaying confirmed devotees, total amounts collected via UPI, and outstanding payment balances across all Yatras.

2. Tabbed Yatra Workspace

Every spiritual tour operates as a self-contained workspace, eliminating page reloads and keeping all relevant information organized under easy-to-navigate tabs.

3. Hotel & Accommodation Research Tracker

- A spreadsheet-style module to record hotel evaluations (distance to temple, room prices, extra mattress costs).
- Toggle statuses for `Contacted`, `Shortlisted`, and an exclusive `Final Selected` toggle that automatically highlights the chosen accommodation.

4. Seamless Devotee Registration (with 15-Day Expiry)

- **Public Links:** Instantly generate shareable registration URLs for each Yatra.
- **Deadline Enforcement:** Registration links automatically expire after 15 days (customizable), seamlessly blocking late entries.
- Collect critical participant data including family size, strict dietary requirements (e.g., Sattvic, No Onion/Garlic), and essential medical notes.

5. Automated UPI QR Payments & Verification

- Upon registering, devotees are presented with a dynamically generated UPI QR Code tied directly to the organizer's bank account.
- Devotees upload their transaction screenshot and reference number securely.
- Organizers can verify or reject payments with a single click from the dashboard, instantly updating the devotee's confirmation status.

6. Intelligent Expense Splitter Calculator

- Track all Yatra expenses (Transportation, Food, Temple Donations).
- Allocate expenses to `Everyone`, `Selected Families`, or `Selected Individuals`.
- The system's algorithm automatically calculates per-person shares (factoring in family size), subtracts their verified payments, and instantly calculates exactly who has an outstanding deficit.

7. Integrated WhatsApp Communication

- One-click "Welcome", "Payment Reminder", and "Verified Receipt" buttons directly inside the Devotee table.
- Automatically opens WhatsApp Web or the WhatsApp App with a pre-formatted, personalized message containing the devotee's name and yatra details.

8. Self-Service Devotee Portal

- Devotees log in using simply their registered phone number.
- They can view travel schedules, upload proof of payments, and instantly update their own profile details (which syncs immediately to the Admin's dashboard).
- **Photo Sharing Gallery:** Devotees and organizers can upload photos. The organizer has a one-click "Download All Photos to ZIP" feature to easily archive memories.

9. Export & Printable Reports

- Export all financial data and participant lists directly to CSV format for external auditing.
- Dedicated formatting for clean printing.
